NASA Tech Talk

▼ 🧡 Proposal — Engage Montgomery Goforth (JSC)

Montgomery B. Goforth —

Acting Director, JSC Business Development & Technology Integration Office (BD&TIO); JSC Chief Technologist.

Prior: Assistant Director, Strategic Pursuits & Partnerships — JSC Engineering Directorate. 40+ years at JSC (since 1990);

principal external bridge between JSC and the Houston innovation community.

Proposed engagement angles

1. **Houston innovation pipeline.** Position Khanstruct as a recurring contributor to BD&TIO's mandate of identifying space/terrestrial technologies of interest to JSC and Human Space Exploration.
2. **NASA Force Initiative.** Map a Khanstruct AI/automation capability to one of the tech-development ideas presented in the 2026-04-23 Tech Talk.
3. **Space Apps continuity.** Reopen the 2024 Space Apps thread (JSC Partnerships referred to the GO Team and EMERGE) with Goforth re-engaged as the Houston-area JSC sponsor of record.
4. **Unsolicited Proposal (FY2026).** Frame a Khanstruct concept against the open NASA Unsolicited Proposals window (closes 2026-09-30) with Goforth as JSC technical sponsor; tracked on this page under *Active Proposals & Solicitations*.

Next actions

- ☐ Attend the next biweekly JSC Office Hours at the lon; pitch one Khanstruct capability tied to a published JSC challenge.
- ☐ Send a follow-up email to Goforth referencing the 2026-04-23 Tech Talk and the positioning above.
- ☐ Update the **Tech Opportunities** row in 🧡 [JSC Universe — Engagement Map](#) with contact outcome, new *Last Touch*, and incremented *Evidence Count*.

Open questions / gaps

- I'm an AI engineer based in Houston, and I want to be the AI person at JSC. I've been in the Tech Talk crowd for a few years now and I've seen where things break.

Question 1 — the SBIR funnel

Out of everyone who shows up to Tech Talks, how many actually end up submitting an SBIR? Where do most people drop off?

Question 2 — Tech Talks vs. real submissions

What's missing from the Tech Talks that would help someone actually submit a real solution to a JSC problem? What do attendees still not know after they leave?

Strategic questions for Goforth (mapped to Tech Talk history)

Four questions tied to documented patterns in the Tech Talk series. Each maps to a consolidation opportunity Khanstruct can credibly help solve.

1. **Networking → Contracts pipeline.** As Chief Technologist, how are you measuring the transition from the Second Draught networking sessions to actual Phase III SBIR contracts or technology licenses? Where is the "experience" of the talk failing to convert interested innovators into active JSC solvers?

2. **Texas-France Space Hub integration.** The Hub is now in its second cohort. Based on the first cohort (Absolut Sensing, Geeglee, Agena Space, Watt & Well), what is the biggest logistical problem in integrating these international startups into the JSC ecosystem? How can I help streamline the interaction between RSI, the Consulates, and your office so cohorts solve local JSC needs rather than just visiting?
3. **Shutdown-resilience (Oct 23 2025 cancellation).** The October 2025 Tech Talk cancellation showed the series is vulnerable to federal funding cycles. How can we consolidate more private-sector partners (Intuitive Machines, Orbital Mining Corp, etc.) so the problem-solving mission continues during government lapses?
4. **RITF access bottleneck.** You're now inviting commercial partners to use the Receiving Inspection and Test Facility for counterfeit-part detection and failure analysis. What is the current bottleneck for startups trying to access RITF, and how can we organize these groups so they aren't competing for the same test windows?

Additional contacts to engage in parallel

Contact	Role	Why they matter
Montgomery B. Goforth	Acting Director, JSC BD&TIO; JSC Chief Technologist	Lead. Houston aerospace expansion + tech-opportunity scouting.
Molly (White) Bannon	Innovation & Strategy Specialist, BD&TIO	Adjacent already in row 🛠️ Tech Opportunities ; presented NASA Force Apr 23 2026.
Nick Skytland	Previous / co-leader, BD&TIO	Continuity figure for the office; longer institutional memory.
Walt Ugalde	Lead, Technology Transfer Expansion (T2X)	Owner of the "From Space to Startup" pathway — direct match to Khanstruct positioning.
Dr. David Alexander	Director, Rice Space Institute	Primary academic/international consolidation partner; Texas-France Hub anchor.

Statement of Interest — Draft Answers (JSC BD&TIO Form)

Draft responses to the JSC "Let's Connect" SOI form (Google Forms ID [1FAIpQL5d5qI7s5_K33M1l6X1YAnpnSXv-K3-cpI_RGp6hVh1CVP2p6g](#)). Grounded in workspace data; gaps flagged.

▼ 🎯 "Primary area of interest with NASA JSC" — dropdown options

Full list of selectable values from the JSC SOI form's "Primary area of interest" dropdown. Use as the source of truth when picking a primary + secondary area.

- ☐ Future procurements (products or service solicitation)
- ☐ Partnership for Technology Development
- ☐ Access to JSC Capabilities
- ☐ Access to JSC Expertise
- ☐ Interest in licensing NASA Technologies
- ☐ Interest in using NASA Software
- ☐ NASA Competitive Opportunities or Solicitations
- ☒ [NASA Prizes, Challenges, and Crowdsourcing Opportunities](#)

☐ Other

Current draft pick: Technology Transfer / Commercialization (T2X) — *not in the dropdown verbatim*. Closest matches: **Access to JSC Capabilities**, **Access to JSC Expertise**, or **Partnership for Technology Development**. Confirm before submitting.

Field	Draft answer		
Organization Name *	Khanstruct		
Organization type *	Small Business / Sole Proprietorship (LLC formation in progress). Gap: confirm exact option label on the form and pick the closest match. If "Startup" is offered, use that.		
U.S.-registered, U.S.-owned, eligible for federal contracts, export-control compliant *	N/A (most defensible answer today). U.S.-owned and U.S.-based (Tulsa, OK), but Khanstruct is not yet a registered LLC and you do not yet have an active SAM.gov / UEI / CAGE registration on file. Gap: if you want to answer "Yes," complete LLC formation + SAM.gov • a written export-control posture first.		
Website Link	https://thekhanstruct.com (primary); supplemental: https://g.dev/khanstruct , https://github.com/zainkhan1994		
Primary Contact Name *	Zain Khan		
Primary Contact Job Title *	Founder & AI Engineer, Khanstruct		
Primary Contact Email *	zain@thekhanstruct.com (business). Form is currently signed in as zainkhan1994.zk@gmail.com — either is reachable.		
Primary Contact Phone *	832-382-1675		
Primary area of interest with NASA JSC *	Technology Transfer / Commercialization (T2X — "From Space to Startup"). Secondary: SBIR/STTR partnership and innovation-community programming with BD&TIO.		
Intent, desired outcome, why JSC is uniquely positioned to help *	Khanstruct is an applied-AI studio building agentic systems that consolidate fragmented innovation pipelines into structured, queryable workflows. After 4 years inside the JSC-adjacent Houston ecosystem — NASA Prizes, Challenges, and Crowdsourcing NASA Space Apps Local Lead (2022–2025), recurring NASA Tech Talks attendee at the Ion since 2023, — I see a recurring pattern: Tech Talk → Second Draught networking → no measurable conversion to Phase III SBIR contracts, technology licenses, or RITF utilization. I want to connect with BD&TIO to: (1) prototype an AI-driven "innovator-to-solver" tracking layer that follows Tech Talk attendees through to SBIR / STTR / T2X engagement, (2) help structure the second Texas-France Space Hub cohort's integration with JSC technical needs (vs. visit-only), and (3) build a continuity playbook so the series is resilient to federal funding lapses (the Oct 23 2025 cancellation is the canonical example). NASA JSC is uniquely positioned because BD&TIO is the only office with the mandate, RITF access, T2X authority, and Houston-ecosystem convening power to make this		

Field	Draft answer		
	real. The mutually beneficial outcome: a documented pipeline framework that BD&TIO can reuse for any future cohort, partner, or talk.		
Existing work, contracts, or agreements with NASA JSC	No prime contracts or agreements. Existing engagement: NASA Space Apps Challenge Local Lead Organizer Recurring attendee at NASA Tech Talks (Ion, Houston) Attended NASA OSBP procurement and IT briefings (2023–2024). Submitted Statement of Interest 2024-11-07 (Goforth referral). Active applicant: NASA JSC IT Specialist (Direct Hire) GS-14 #865819600.		
Additional information	Flagship build: Cortana — multimodal AI agent (voice + vision + UI navigation) on Gemini 2.5 / GCP / Cloud Run. Built and shipped solo for the Google Gemini Live Agent Challenge. Adjacent builds: a 70+ marker Health EHR dashboard (longitudinal trend analysis), and the NASA Space Apps Houston event website V2/V3 (registration, team submissions, logistics tooling). Community: GDG Tulsa organizer;		

Pre-submit checklist

- ☐ Decide LLC posture: file Khanstruct LLC in OK or TX, OR submit SOI as Sole Proprietorship and answer "N/A" to the federal-eligibility question.
- ☐ If pursuing federal contracts: register UEI on [SAM.gov](https://sam.gov), get CAGE code, draft a one-page export-control compliance statement.
- ☐ Confirm form's exact org-type options (Small Business / Academic / Nonprofit / Other) before final submission.
- ☐ Pick which email to submit under (zain@thekhanstruct.com vs zainkhan1994.zk@gmail.com); recommend the business domain for credibility.
- ☐ After submit: log a new row in [JSC Universe — Engagement Map](#) under "General Opportunities" with Last Touch = today.
